PROFESSIONAL SUMMARY

IT graduate with practical experience in computer hardware and software troubleshooting, PC assembly and repair, routine maintenance, and end-user support. Currently combines warehouse responsibilities—including inventory management and data encoding—with IT support for office and field operations. Experienced in helping maintain computer reliability so engineering personnel can continue preparing solar project drawings with fewer technical interruptions.

PROFESSIONAL EXPERIENCE

Warehouseman | IT Support | AJ3 Electrolink Corp.
January 2026 – Present

- Maintain inventory records and encode item information to support accurate warehouse documentation.
- Provide day-to-day IT assistance, including software installation and removal, desktop PC assembly and repair, and hardware/software troubleshooting.
- Perform computer checkups, routine maintenance, and cleaning to help maintain reliable system performance.
- Provide on-site computer support for engineering personnel working on solar projects, helping keep systems available while project drawings are being prepared.
- Respond to technical issues in time-sensitive work settings and help reduce computer-related interruptions to daily operations.

Computer Support Trainee (OJT) | Magellan Solutions – Centris
February 2025 – May 2025

- Assisted with computer hardware checks, component replacement, and equipment cleaning.
- Supported routine computer maintenance, system checkups, and software updates in a call center environment.
- Helped identify and troubleshoot basic computer and network issues.

Computer Support Trainee | Metropolitan Medical Center – College of Arts, Science and Technology
January 2019 – June 2019

- Assisted with computer repair, hardware replacement, and cleaning.
- Helped maintain computer laboratories through system checkups and updates.
- Assisted with identifying and troubleshooting basic network issues.
